Every Ornithologist

should find the past and present publications of the Cooper Ornithological Club of California, of greatest interest and value. The proceedings of this live Western Club consist of two series:

THE CONDOR,

A 24-page bi-monthly, illustrated magazine, issued on the fifteenth of each alternate month, and aimed to fill the field of an up-to-date bird journal, publishing articles of special interest to technical ornithologists, nidologists and active field workers generally. The two volumes thus far completed outline the journal's policy and scope for the future, and it can safely be assumed THE CONDOR for 1901 will eclipse its previous record in extent and value of material published.

Vol. I (1899), \$2; Vol. II (1900), \$1.; Current Volume, \$1.

PACIFIC COAST AVIFAUNA NO. 1,

"Birds of the Kotzebue Sound Region, Alaska," by Joseph Grinnell. A large octavo 80-page publication, embracing an accurate, detailed and interesting narrative of the author's experiences among the birds of the Far North, during a year's sojourn north of the Arctic circle. The biographies of the 113 species and subspecies of birds treated in the paper are unusually valuable, and the paper is accompanied by a 3-page map of the region.

A sample copy of 'The Condor' will be mailed on application. Address
